

ARGA SATYA MULYONO

Fullstack Developer

 /in/argasatya16

 ameunoia

SUMMARY

Fullstack Engineer (backend-focused) with 2+ years of experience building and scaling production web systems. Specialized in designing high-performance RESTful APIs, optimizing database operations, and implementing complex business logic for ERP and internal platforms. Proven track record in improving system performance (up to 90% faster) and delivering reliable, scalable solutions using TypeScript, Node.js, Hono, Laravel, and PostgreSQL.

SKILLS

- **Technical Skills:**

- **Language:** JavaScript, Typescript, PHP, Go
- **Frameworks & Libraries:** ExpressJS, Hono, ReactJS, Node.js, Bun, Laravel
- **Database:** PostgreSQL, MySQL
- **Tools:** Docker, RESTful APIs, Git
- **Infra:** Linux Server, VPS Deployment, Nginx

- **Soft Skills:**

Team Collaboration, Problem Solving

WORK EXPERIENCE

Fullstack Developer, Getech Indonesia

Nov 2024 - Present

- Developed end-to-end features across backend APIs and frontend interfaces using **Next.js** and **Hono.js**
- Built and maintained mobile applications for Employee HRIS using **React Native**
- Optimized item code generation process, reducing execution time by over **90%** (from minutes to under **10 seconds**)
- Designed and developed a residential fee management system with **payment gateway integration**
- Developed responsive landing pages and admin dashboards to improve user experience and data visibility
- Built an online examination system with **Word document parsing** to convert questions into structured data for dynamic rendering
- Collaborated with DevOps teams to ensure reliable deployments and system stability

Backend Developer, Getech Indonesia

Nov 2023 - Nov 2024

- Built and maintained backend services using Hono, Node.js, and PostgreSQL
- Developed RESTful APIs and business logic for **HRIS, ERP**, and internal systems
- Assisted in **designing** database structures and writing queries for application needs
- **Refactored** existing code and **fixed bugs** to improve system stability
- Handled **debugging** and issue resolution in development and production environments

Web Developer (Intern), Kopnus Pos Indonesia

Aug 2022 - Sep 2023

- Developed internal web apps with **Laravel** for data input and management.
 - Designed simple and intuitive UIs to improve internal workflow efficiency.
 - Deployed applications and configured hosting environments for stable operation.
-

EDUCATION

Associate of Informatics Engineering (3.71)

2023

Akademi Manajemen Informatika Garut
